SEA SICKNESS

I have much pleasure in tealifying to the ment of NECTANDRA AMARA as a remedy for sea-sickness.

I used it recently on a voyage and found

medy for sea-sickness.
I used it recently on a voyage and found it mostefficacious. Rio de Janeiro, 15th August 1895.— E. RICHARDSON.

JINGOES AND SILVERITES. By Edward Atkinson.

One of the most subtle, and, since there is no other word so expressive, most damnable arguments which have been pre-ented in support of the free coinage of silver by this country without regard to the action of other countries, i.e. it is a like the coincident of the countries of the souther southers in the southers when the southers in the southers in the southers when the southers were southers when the southers were southers when the southers were so were southers were southers were southers were southers were so were southers were southers were southers were southers were so were southers were southers were southers were southers were so were southers were southers were so were southers were southers were so this country without regard to the action of other countries, is that it is for our interest and profit to take action on every point in reverse to the acts of Great Betioin. This proposal has been carried so far by some of the attorneys of the owners of silver mines as to lead them to advocate a war with Great Britain as a means of profit and benefit to the United States. The danger in this view of the matter is that it may find a ready response in a large class of legislatus. ready response in a large class of legislators who regard all imports from foreign connwho regard all imports from foreign countries as of the nature of a war upon our dosmestic industry. Witness the fact that in the effort to promote partism legislation and to seek favor with the so-called silver party, the junior senator of the state of Massachusetts has proposed a policy on behalf of the so-called silver interests in our draitings with Great Britain even more grossly didiculous than the conception which the attorneys of the silver inners have pressented.

Altimets of the silver inines have presented.

His proposal was to attempt to force Great Britain to adopt a bimetallic treaty of legal tender by putting differential datus in Great Britain to adopt a bimetallic treaty of legal tender by putting differential duties in this country upon the products of Great Britain. These facts distinctly prove that there is no argument so gross in its nature that it may not be employed by men of public station, otherwise of good repute, in their effort to compass party success. It is a salt commentary inpon human nature, giving an example of the depravity of mind which may be brought upon a man who suke the principles of a statesman in order to compass the success of a partisan.

The Jingo element can only become dangetons through the negligence of the mass of thinking men. That men are negligent is witnessed by the fact that those who wild promote war with Great Britain do not immediately become disgraced as they might rightly be.

might rightly be.

might oghtly be.

There is another bad feature in the existing state of opinion. A great deal of money has lately been expended at the public cost in the construction of a new mays. We sarely needed a certain type of war vessels to which no exception could be taken in the present state of the world. We required atmed emissis which could be speedly sent to dangerous noints for the protection of to dangerous noints. our citizens inforced in the protection of our citizens inforced lands and for the protection of our commerce. We may have been justified in constructing one or two so-called lands, this widely may be a constructing one of two so-called lands, this widely may be a constructing one of two so-called lands, this widely may be a constructing one of two so-called lands, this widely may be a constructing one of two so-called lands, this widely may be a constructing one of two so-called lands. been justified in constructing one or two so-called battle ships without waiting for their worthlessness to be doclosed; but we can not be justified in having constructed two very costly vessels of war which are known in the rivy and generally among the peo-ple as "commerce destroyers." That name is a disgrace to the ship, to officers of the navy and to the nation. These two ships of war cost about seven inflion dollars or a little more. That sum is nearly as great as the endowment of our oldest innversity, Harvard. The annual cost of maintaining these vessels in service is nearly, if not quite, equal to the pay roll of Harvard Uni-versity. The time was when it was con-sidered justifiable for any army to sack a these vessels in service is nearly, if not quite, equal to the pay roll of Harvard University. The time was when it was considered justifiable for any army to sack a city and for the officers and soldiers of an aimy to enrich themselves from the plander of the private houses and other property of a conquered country. That time has long since passed. The sacking of cities is a disgrace. Private plander is treated as robbery. An officer joining therein ceases to be a gentleman, and is regarded as a thref. Yet what would disgrace an army and its officers upon the land may be imposed apon the navy and its officers as a duty. It is now held to be among their lawful functions to do the work of prates in ship so for a part of the public cost, bearing the degading name of "commerce destroyers." The nation was even represented at the recent opening of the peaceful can'l at Kiel by one of these yieldy named armed vessels.

What could have been in one grotesque than the display of war vessels at the opening of the ship cand at Kiel by one of these yieldy named armed vessels. What could have been in one grotesque than the display of war vessels at the opening of the ship cand at Kiel by one of these yieldy named armed vessels, of the first private property from secure rapion the seasy worthless in the tace of the latest type of gun and shell, accompanied by twenty-five smaller vessels, cont thicther from various states and nations, at a very heavy cost, to celebrate the opening of a cand whose purpose is to carry cotton, fibres and metals to the people of Germany, in the conversion of which into finished goods for

export they may be enabled to sustain the increasing burden of armies and navies. The cost of the canal was about forty million dollars. The waste upon these big and manly worthless war ships must have represented an expenditure of not less than two hundred million dollars.

The daships of these arrains

two hundred million dollars.

The display of these engines of destruction was mostly made by the nations of continental Europe, which nations or states maintain, within an area of European territory about corresponding to that of the United States, omuting Alaska, barriers to mutial service at the borders of separation, at which a revenue is collected by taxes upon imports, supplemented in some cases by hountres upon exports, not quite equal to the cost of sustaining the armies which, except for these barriers to mutual service, to the cost of sustaining the armies which, except for these barriers to mutual service, would have no reason for their existence. In this way the inherited projudice of face and creed is maintained while the prople are kept in a condition of poverty which, in respect to many of these states, is year by year becoming more hopeless.

Contrist these continuous and its contributions with the conditions of the contribution of the contribution of the contributions with the conditions and the contributions with the conditions are contributed to the contribution of t

which, in respect to many of these states, is year by year bey ming more hopless.

Contrist these conditions with our relations with the neighboring Dominion of Canada. It is true that in 1866, I believe, we also loned the treity of reciprocity under which for many years the people of both sections of this continent had greatly thriven, and that we are now stilling to recover the advantage which we might have enjoyed thoughout the intervening period by making another treaty. We exchange some of the products of our agriculture with Canada, and, owing to our more southern position and greater sunshine, we are enabled to supply her with the products of our fields in rather larger measure than she can supply us. There is no antagonism between us, and throughout the long of our fields in rather larger measure than she can supply us. There is no antagonism between us, and throughout the long civil war not a ship was needed to watch the harbors of Canada lest an attack should be made from them upon us, and not a regiment was called for to gnard our long northern hontier. On that frontier there also exists a canal, for greater in its service than the canal at Kiel can ever be. The tomage which passes yearly through the tonnage which passes yearly through the St. Mary's canal, which unites our great lakes, exceeds that of the Suez canal. Yet

lakes, exercels that of the Suez can 1. Yet not a lort is required to grand that can 1, and not a ship of war is permitted upon either of the great lakes.

The true M unne doctrine, so different from that which the Jingo element among our politicians so grossly interpresents, has been applied to these lakes since (\$18. After the last war with Great Bittin the United States, possessed the complete model. After the last war with Great Bittin the United States possessed the complete naval control of the lakes. The arme I vessels of Great Britain had either been destroyed or were laid up almost worthless in the harbors of Canada. In 1817 John Quincy Adams, minister to Great Britain, proposed to the English government that neither should thereafter maintain any armed naval force upon the lakes. This course was advocated in order to "avoid the dinger of collision and to save expense." The subject was duly considered for nearly a year in Washington and in London. John Quincy Adams returned to America and become secretary of state. In 1818 President Montoe stated to the Smate that an agreement had been mide permitting four revenue come secretary of state. In INIS President Monioe stated to the Snate that an agreement had been made permitting four revenue cutters on each side, each with one gun, upon these great final waters. Aside from that, no armed ship was to be permitted. He asked the Senite to express its judgment upon this agreement which had not even taken the dignity of a formal treaty, and when the assent of the Senate had been given he assent of the Senate had been given he assent of the proclamition certified by John Quincy Adams, secretary of state, under which peace has been maintained, collision hits been avoided, and an en omous expense has been avoided, and an en omous expense has been avoided, the construct "commerce destroyers" in express their practical functions under the dag of the Union upon the open sens!

no nution, however under the control of a military caste, would dare refuse assent to

such an agreement.

We, there'ore, have the whole monal and economic force of the community on the one side and the Jingo element on the other—the one comprising the great body of thinking people, slow to observe, slow to make up its mind and slow to act; the other noisy, unprincipled and aggressive, taking advantage of every petty prejudice to excite animosity and to betray the peace of the country. If there be no higher motive required to arrest political depravity, let the economic side of the question only be regarded. By what nations is the commerce mainly conducted which it would be the function of our "commerce destroyers" to work their evil upon in case of war? such an agreement. to work their evil upon in case of to wolk their evil upon in case of war? Almost wholly by England and Germany, our two largest customers for the excess of our products of the field and of the farm; also by the Scandinavian nations and the Netherlands, who are the middle men among nations, bearing our products across the seas and bringing back from the tropical and semi-tropical countries the products that we need.

What would be the effect of war with either Facland or Germany, coupled with

either England or Germany, coupled with the destruction of their commerce? The the destruction of their commerce? The surplus product of western farms and southern plantations might rot upon the field. The proportion of grain exported, or of dairy products and meats, is not as large as the proportions of our cotton export, yet if shut in and thrown upon the market already fully supplied, it would depress all prices to the loss and damage of every larmer in the land, while on the other hand, cutting off the supply of foreign fabrics would for the time being give such a monopoly to domestic manufactures as to increase the cost of everything that the larmer buys. It is perfectly logical for the advocates of a prohibitory tailff to take the position long since taken by Henry C. Carey, who said that "he would regard a ten years' war with England as the greatest material benefit that could happen to this material benefit that could happen to this material benefit that could happen to this country." People are wiser now than they were when they listened to such a false prophet, and yet there are to-day a sufficient number of ignorant persons to whom a similar appeal is made.

Again: The attorneys of the silver miners and their coadjutors arge the adoption of the silver transport and the demonstrates.

tion of the silver standard and the demonstration of gold on the ground that it is for our interest to take the reverse of the policy our interest to take the reverse of the policy of Great Britain, where the gold standard has been maintained for two generations and where it will be maintained. The audacity of this proposition is only equalled by its absurdity. A very large part of the foreign exports of Great Britain and Germany are to the silver-using nations of Asia, Africa and South America. The exporters of Great Britain have, in fact, been exposed to a good deal of hardship end difficulty in adjusting the terms of exbeen exposed to a good deal of hardship and difficulty in adjusting the terms of ex-change with their principal customers. What could be a greater relief to Great Britain than for the United States to sell her the cotton, the corn, the dairy products and presently the coal and the ores which she must have for conversion into finished and presently the coal and the ores which she must have for convertsion into finished fabrics, giving her the opportunity to convert them into these finished goods and then to sell them to the silver-using nations on silver payments? Once give Great Britain the opportunity to put that silver upon us under a treaty of bimetallic legal tender by which we should deprive ourselves of any choice as between silver and gold, and we should at once relieve British manufacturers and bankers of all the difficulties which have grown out of the change of the ratio of silver to gold, taking all these difficulties upon ourselves. If any argument could be invented giving greater evidence both of audacity and inhecitity I have yet to find it. The destruction of a lool is his own folly, and when the advocates of silver monometallism, at the ratio of sixteen to one, venture into this last ditch in their effort to stay the rising tide in support of sound money, they disclose both their audacity and imbecility.

Again: The unscrupulous Jingo element of the consestion. In President Cleveland

needed again in this case is an agreement needed again in this case is an agreement among the great matal powers "to avoid collision and to save expense" by neutralizing the islands and the waters adjacent thereto, giving all equal opportunity to land cables, to conduct their trade and to keep their stores of coal wherever they choose, while protecting the people of the islands in their rights. islands in their rights.

islands in their rights.

We may regard the parcelling out of harbarons or semi-barbarons continents like Africa among the powers of Europe with perfect equationity, and yet we may regard it as being to our great interest whenever or wherever the power and protection of the English speaking people is extended over barbarous countries. Wherever Gerof the English speaking people is extended over barbarous countries. Wherever Germany and Frame gain a hold their effort is to keep the sole control of commerce, and so it has been with the Dutch in the Philippine islands. Wherever England establishes her control or protectorate it is to the benefit of the masses of the people of that land, even though they resist the somewhat rough and tactless methods by which they themselves are benefited. The Freuch may have tact; but they use that tact for private gain and plunder. The Englishman may lack in tact; but, in these latter days, he uses his power to establish justice in the administration of semi-civilized countries. ministration of semi-civilized count Witness the fact that the Egyptians are semi-civilized countries. Witness the fact that the Egyptians are no longer spoiled. For the first time in history, the fellahs in Egypt are beginning to enjoy the fruits of their own industry. Wherever England exerts her control the purchasing power of the mopile is increased, a demand for goods made by machinery begins, and England attempts to make no discrimination, but gives to all an equal chance to supply these wants. Contrast her pulicy with that of the Spaniards. Contrast the condition of her colonies with the condition of those which were under the condition of those which were under the control of Spain and Portugal. Witness the present conditions of South America as the present conditions of South America as compared to any English colonies or settlements. What a boom it would be to the world if systems corresponding to English law, English administration and the English regard for personal rights, could be extended over the continent of South America. A paramount position in that international commerce through which men and nations benefit and profit each other by serving each other's needs is passing to this country. The people of the United States constitute the only nation among the machine-using nations of the world who positioners.

chine-using nations of the world who pos-sess within their own limits the power of producing food, fuel, iron, steel, copper, umber and innumerable fabrics far in ex-cess of their own wants. They are subjected to the lightest burden of national laxces of their own wants. They are smjected to the lightest burden of national taxation as compared to any and every other machine-using nation. Holding these advantages, their products are made at the highest rates all wages in every branch of industry, except mere hamilicafts, as compared to those of any other country, and yet at the lowest cost of production measured by the unit of product. There has never been a period in this country when economic questions were being so exhaustively studied by great numbers of people. Let them but turn their attention to the facts which I have given in this paper and the Jingoes among our politicians will be stamped out if political existence in company with the advocates of the debasement pany with the advocates of the debasement of our unit of value.

YELLOW-FEVER REFRIGERATORS.

YELLOW-FREVER REFRIGERATORS.

Some years ago a Dr. Garcia, of Cuba, invented a "refrigerating-box" for the treatment of yellow-fever, which, after practical application during several epidemics, is said to have prived fauly snecessful. The apparatus consists of a bottomless double-walled wooden-box, about 5½ feet high, 7 feet long, and 4½ feet wide. Ahout 3 inches of space is left hetween the walls, and a small window publish the attended to observe the artifact. space is left hetween the walls, and a small window enables the attendant to observe the patient, who is put into the hox, bed and all. The roof is make with two slopes, like the roof of a house, with sufficient incline to allow the condensed steam to run down it into a smaller gutter in the interior. The roof is double, with a space of about 5 inches between the walls to contain the ice, and is hinged so that each side of it can be opened from the outside to introduce the ice. The outer lining of the roof is of wood, and the inner one of copper sheeting. There are pipes communicating with the ice-deposit in the roof to carry off the melled ice, and there are systems of ventilation round the top and both their audacity and imbecility.

Again: The unscrupplous Jingo element of the opposition to President Cleveland have attempted to create a prejudice against his administration of the Hawaiian question by alleging that England is waiting to size these islands. It is utterly false. No nation seeks the responsibility for taking these islands, subject to the enormous expense of arming and defending them both upon the land and upon the sea. What is

Rio de Janeiro, 18th October, 1893

TRINIDAD ISLAND. THE CRUISE OF THE "ALERTE",

TRINIDAD ISLAND.

THE CRUSE OF THE "ALERTE",

I must now apologise to Jacko for not having before this introduced him to my readers. He was a delightful little creature that we had purchased on the praia at Bahia. He was very affectionate, and was free from malice, though, of course, full of mischief. He had a red blanket of his own, which he would earry about with him wherever he went, and should a few drops of rain fall or spray come on board, he woulddeftly roll it about him in the fashlon of a cloak, with his funny little head just peeping out of the hood. He was very fond of tea, and while we were at sea he took his 4-am. cup with the others. As soon as the cook began to lift the hoiler of tea from the stove. Jacko would give a whistle of delight, clamber up the pantry wall, unhook a pannikin, and walk up with it to be filled, "all de same as a little ole man," as the cook used to say. It was amuslug to see him test the temperature of the tea with his fingers before drinking it. He was a marvellously intelligent and jolly little creature, and is now dwelling happily in a little house on a cocoanut tree in a plantation near Port-of-Spain. He prefers a West Indian life of warmth and anifinited bananas to an existence in a damp ship on salt junk and bisenit.

At noon, as the sea was still smooth, we made our first attempt at landing in Treasure Bay. We put the whale-boat in the water, and londed her with about a ton of stores, consisting of tinned provisions of various sorts, biscuit, salt beef, the pick, spades, crowbars, wheelbarrows, hydraalic jack, and other tools. We also took in tow a raft constructed of the long banhoos we had brought from Bahia. These we knew would be useful for several purposes.

I steered the boat, while the Doctor, Powell, Pursell, and the rook in tow

a rait constructed of the long bamhoos we had brought from Bahia. These we knew would be useful for several purposes.

I steered the boat, while the Doctor, Powell, Pursell, and two paid hands took the oars. Having the wind behind us, we were not long in crossing the two miles of smoothly heaving sea that lay between us and South-west Bay. We rounded the point into the bay, and leaving on our port hand the islet in the middle, we made for the channel which the doctor and myself had surveyed from the mountains. When we came near we found that there were three parallel lines of breakers to be traversed, and, consequently, there was a treble chance of swumping. The surf was much user formidable than we had expected to find it, considering how smooth the sea was outside the bay. The wind was blowing in strong gusts right off shore over the depression in the mountains at the back of the bay. It drove off the tops of the indepression in the mountains at the back of the bay. It drove off the tops of the incoming waves into great veils of spray, curling over in a contrary direction to the curl of the swell, and bright with shifting rainbows as the sun's rays fell upon it. The hay presented a most beautiful appearance from the bont, and those who had not seen the pirates' hamt before attered exclamations of admiration and wonder. Between the gloomy black mountains on the left, and the uncarthly-looking dark red walls of Noah's Ark on the right, was a seene which, flooded with tropical sinred walls of Noah's Ark on the right, was a seene which, hooded with tropical similight, earth and ocean vied with each other in vividness of colouring. Directly in front were the great rollers of transparent green, their snowy crests flashing with rainbows; beyond, dazzling golden sands; above, domes of brilliant emerald cleaving the cloudless sky.

But this was no time to dwell on the beautiful; we had other matters to consider. The grand rollers with their breaking tops had no charms for us, for we had to get through them—a risky undertaking with a deeply laden boat.

We discovered afterwards that it is al-

with a deeply laden boat.

We discovered afterwards that it is almost impossible to judge from the height of the swell near our auchorage, or from the surf on the pier, whether landing in South-west Bay is likely to be easy or the reverse. The surf on this sandy beach is governed by a different system of laws to that which prevails on other portions of the coast of Trinidad. Here, curiously enough, there is more surf when the wind is blowing off shore than when it is blowing on. The north-west wind, sweeping in violent rusts down the slopes that back the bay, offers a resistance to the swell rolling in, and piles it into steep walls of water, breaking dangerously. The south-east wind raises a higher swell outside, but, blowing right into this hay, drives the sea down, and the landing becomes comparatively easy. At the auchorage opposite the cascade the contrary is the rule; with a north-east wind blowing off shore the sea is smooth, with a south-eaven than in South-west Bay. We discovered afterwards that it is al-

The men rested on their oars and we watched the surf from a safe distance to discover if there were any chance of picking a favourable opportunity for landing. It would be a disappointing matter if we had to pail our boatload of stores back to the yacht against the wind; so, after a little hesitation, I decided to risk the landing. One must run some risks on such a place as Trinidad, and we might as well begin at once. All in the boat were delighted at the decision.

Every one knows how the ocean swell proceeds in regular rhythm, and how one sees at intervals three greater waves than usual come up, one after the other, to be succeeded by a comparative calm. We took the boat just outside the onter breakers and awaited one of these smooths. Soon three great waves passed under us, and broke beyond us with a terrific force. Now was our time, and we made a dash for it. The long ash oars bent as the men, putting their backs into their work, drove the boat through the sea. Pull away! Pull away! The first row of breakers is passed; then we are safely borne on the top of the second, looking down upon the beach as from a hill. It passes us and breaks. All safe so far. We are close to the beach as from a hill. It passes us and breaks. All safe so far. We are close to the bach as from a hill. It passes us and breaks had simply be rolled over it if we tried to back the boat against it, so the men strain at their oars to reach the shore before it. The boat is just touching the sand, the order is given: "All hands overboard and haul her inp," when the sea pours over our heads, filling the boat. The men leap or are washed overboard. One catches hold of the long painter we had provided in case of such an energency and contrives to reach the shore; then, planting his heels in the sand, he holds on with all his strength to prevent the boat being swept into deep water by the receding wave. At first the other hands are out of their depth, but, as the roller comes on to help us up a bit further. Here it comes on shore to assist the

ance of fuel in the neighbourhood, for the dead trees were streamed all over the hillside.

We had not brought off any of the tents, but, with a good fire and plenty to eat, drink, and smoke, there would be little hardship in sleeping out; and the doctor and Powell volunteered to stay on store, while I went back to the yacht. It was my intention to return, if possible, on the following day, with the tents and stores, and to then leave a working-party on the island. We might perhaps on the other hand, be prevented by a heavy sea from landing again for a week or more; so we bade our companions an affectionate farewell, and enjoined them not to be lazy, but to dig away until they saw us agam—a quite unnecessary suggestion, for they were very keen to begin work.

Taking with me Pursell and the paid hands, we handled the boat down to the beach; we dragged her into the water quickly just as one big roller was recoil, inc. jumped in and pulled hard out to sea, We shipped a little water at the second line of breakers, and were then in safety.

We soon found, as we pulled back to the yacht, that our boat had spring a leak for the water was pouring in fast through her bitten, so that we had to step and bale occasionally. She was an excellent sea-boat, but lightly built, and her bumps on the sands had done her no good.

EDITORIAL AND PUBLICATION OFFICES:-79, Rua Sete de Setembro FOSTOFFICE ADDRESS:-Caixa 360.

RIO DE JANEIRO, DECEMBER 17th, 1895.

TO-MORROW will be the first anniversary of the date on which we resumed publication after ohr arbitrary suspension during the naval revolt. We shall not fly any bunting on that occasion, nor shall we celebinning on that occasion, nor shall we celebrate the event with champagne and toasts. We desire to say, however, that The Rio News has more friends, more advertisements and a larger circulation to-day than ever before. More than that, it is to-day read by scores of Brazilians who never thought of it before the revolt. So much tor the effort to suppress a newspaper whose simple object was to publish and discuss the news of the day impartially and fearlessly! The dictator and his jacobin supporters were, of course, able to inflict seporters were, of course, able to inflict se-vere loss upon us and to cause us much in-convenience and injury, but they were not able to deprive us of the popular apprecia-tion of our work which has since been manifested in many ways. As a rule, the manifested in many ways. As a rule, the exercise of arbitrary and oppressive authority works its own destruction. It may take time, and many may suffer irremediable loss and injury, but the day must come when justice will resume her sway. We have never claimed to be more than a representative of foreign business interests in resentative of fireign business interests in this country, nor have we ever gone beyond the limits of that rôle. We have discussed political questions because they have an intimate influence upon business, and we have discussed executive acts and legislative measures wherever they touch upon trade and industry, upon the protection of life and property, and upon the development of this country. All these matters are within our province, and, as heretofore, we shall continue to make them subjects of discussion in these columns. sion in these columns.

The present condition of the general revenue bill in Congress can be very fairly measured by the extracts which we take from the Jornal do Commercio in regard to increased duties on imports. If there is increased duties on imports. If there is any one important lesson to be drawn from this mischievous piece of legislation, it is surely this—it is a radical error to permit the incorporation of tariff legislation in the annual budget bills. Time is required for the consideration of such legislation, and expert testimony of the highest order is needed. As a tile the legislator knows absolutely nothing of commerce, of business, of banking, and of ordinary commercial accounts. We say, as a rule, for there are a few who have been trained in business, but the great majority are lawyers, physicians, planters and others whose occupation and tastes have not made them familiar with commercial questions and familiar with commercial questions and accounts. It would be a miracle were an assemblage of such men able to take up so complicated and difficult a question as that of imposing customs duties on imports, particularly when farther complicated by two smtaxes, a fictitions basis of exchange two smtaxes, a fictitions basis of exchange and the inclusion of a fractional part of the tax in gold, and settle it within a few days, or a few weeks, without making mistakes. That such mistakes, and serious ones, have been made, the *Jornal* proves beyond all dispute. To raise the duties on articles of necessity, such as food, clothing and medicines to such an extraordinary degree is cines, to such an extraordinary degree, is simply to court disaster. It will not serve the cause of protection, nor of the coun-

try's prosperity, nor of public health, nor of public morality. It is the work of madmen, and it proves how utterly incompetent this Congress is to deal with such questions. To make the poor laborer Silva pay ten times the cost of an article of clothing, in order to enable manufacturer Mattos to run an expensive factory, is more than mijust—it is sheer highway robbery. There is no patriotism in injustice. Such legislation should be forbidden by the constitution and the speculator who seeks to stitution, and the speculator who seeks to oppress his neighbors with such taxes merely for his private benefit, should be merely for his private benefit, should be considered guilty of a musdemeanor. In our opinion, the only safe and judicious way ont of the difficulty is to suspend all extraordinary expenditures for 1896, and then to drop all tariff legislation from the revenue bill, leaving these questions for consideration in a special bill next year.

TARIFF ABSURDITIES.

The Jornal do Commercio of the 13th inst. pub lishes the following comment on the proposed changes in the tariff contained in the general revenne budget :

changes at the fartit container in the general revenue budget:

"The finance committee in the Senate undoubte. Senate undoubte."

"The finance committee in the Senate undoubte. Senate undoubte.

Let us make known fully the cost natch by the present tariff:	of the dis-
Net weight, kilos	1.134
	18620
Presentility, per kilo	1 7020
Duties paid	1,837\$080
60 n present tax	1,102\$248
	2,939 \$328
30% additional	8815798
20.9 Milliotenini	0010790
	3.8211126
Let us see this same invoice under th	
Not weight, kilns	1,134
New tarill.	7 \$200
New farm.	11200
Duties prol	8 164\$800
40%, proposed lax	3,265 \$920
40% proposed accurate	3,2031,920
	11,430\$720
30"Z, additional	2 4304016
30%, 30000000000000000000000000000000000	3,429,7210

14,859\$936 by the pre-We find, therefore, that the invoice by the present ratiff paid 3,8215.26, by the majosced tailff will pay in the custom-house 14,859\$936.1.1

But the proposed law orders at hird paid in gold, at par, in say £557, which at the exchange of 9 cot 15,039\$000.

We have, then:

Two-thirds in currency

9,906\$624

One-third in gold

15,039\$000

Total 24,945\$624

To resume: an invoice which by the present toriff anomats to 3,821\$125, will amount by the proposed tariff, in all its requirements, to 24,945-

truff annumers to 3,8218120, will amount by the proposed tariff, in all its requirements, to 24,945\$624,!!!

But it is not this assumption only which leaps into view, after a simple investigation.

The present tariff impuses a tax of 4\$200 on single childs, cassineres and cassinetes, with or without mixture of silk, which weigh for a window of the same goods which weigh my to 600 grammes per square metre. The proposed tariff impuses \$\$\frac{1}{2}\$\$ on the same goods which weigh my to 600 grammes per square metre. Now, as the goods imported into brazil, with very rare exceptions, weigh much less than 600 grammes, it follows that all the goods imported will recomm subject to that absurdity.

Another article taxed is, for example, perfumerics, medicines, etc. A kilo of pills by the present artiff would pay 4\$800 dutes and 2\$400 more in surfares, or 7\$200 in all. By the proposed tax it will pay \$\$\frac{3}{2}\$\$ food units, which with the surfaxes and a third in gold is elevated to 18\frac{2}{2}\$\$ food in this manner, and the customs revenue will undoubtedly dimmish, instead of increasing. The result will be non-productive.

We can aftern that in no country of the world where there are custom-houses and where taxes are levied, could alteration so a rhitrary and so gratuitous he proposed, without its leting fermally understood that inportation was to be prohibited.

On the next day the Jornal continued the dis-

On the next day the Jornal continued the discussion in the following terms:—

"We have before us another invoice, relating to a case of wholen serge, consurising 648 metres, which cost including commission expenses £69.17, which at 9½4, exchange represents 1,8135682. The weight on this case was 252 kilos; it paid in the cust mi-house 2,230,850, upon a duty of 48200 and the respective surfaces of the present tariff. This same case, under the application of the proposed tarifi, a duty of 88, plus 30 of0, plus 40 of0, and plus one-third in gold, will amount to 6,1155!

We will observe, in order to amplify the observation which we made yesterday relative to the conditions in which the proposed duty of 85000 is applicable, that the maximum weight of the casis names per square melie, and hat, therefore, absolutely all the cassineres remain subject to the duty if \$5000, nr 7\$200 for the cassineres it would and cuttum, that is if by chance article 13 of the preliminary dispositions is still applicable to this necelularities. According to report, the inspector and commission or necessarily an increase of these, for seeing what will modobatedly happen, and that is that the castim in casticles are some and will be a since the preliminary to the preliminary of the preliminary of the preliminary to t

will andoubtedly happen, and that is that necessition, will greatly duninish hecause a green part of the articles now taxed will be withdrawn from our market.

Alout the example to which we yesterday referred, that of 1,134 kluss net of pilot cassinere, wool and cotion, it is argued that the third in gold affects only the tax properly so called and not the sittixes of 30 and 40 per cent, but even then, in yiele of this, the increase is so extraordinary that it heomes alism d.

By the proposed tariff, and as we have already demonstrated, that metchandise paid 3,821\$126.

By the proposed tariff, and applying the third in gold upon the duties, not including the surfaces of 1,4250\$20\$1!?

Once the proposed artiff is carried into effect, this merchandise will belong in the number of those which will not come any longer to our narket, and it should be known that the national industry does not produce it.

In the present mouth it is certain that the revenue of the on-ton-house will be greatly increased, but such fact has a prompt justification; the importers are ordering the shopments to them in large consignments of the interchandise whose elevation is amounteed, and which they expect to receive before the proposed tariff guess into exeminon, for the jumpose of anyoning the payment of the conton-house of thisking of exoniting the merchandise whose elevation is can be thinking of exoniting the merchandise whose interested increases at a ratice in time to around the proposed and the help of the conton-house and in once diminish, and in a manifer that will be much felt. Now both the inspector and the infer cummistion know hypersonal experience and he helessons learned from every commy which has single to repair its finances principally though castons tariffs, that the earned of overstrong any article of merchandise its driven of merchandise.

ilour, "Dewirops not admitted." The very mernaid would object to such an absurdity. Main, punn a bumourcus, ah l ça serait une unter affaire for exemple.

To turn again to the mermaid, of whom I wish to speak with all due respect, I must protest against the suggestion that I sympathic with your openly flipper—I mean flippant observations regarding this interesting if somewhat fishly young nerson, and still more breibly against the instinuation that I could possibly think of interviewing her even if she promise to appear with all her scales on, and her hack has done up in hairpins.

Not sir! I suggest that your should play Ulysses in this occision. Invike the and of the guils, trust yourself to the Central railway and I will see that a hand of music and the freworks due to your rank are in readiness against your arrival here.

Let me narrate unto you an ancient falle.

A Soutch bartister was pleading hebre a jolly old Soutch judge the cause of a good-hoking widow named Tuckell. Adviressing the heath on her belaff he began, with a demne tewinkle in his eye!

"Tirkell, my client, my hid. — "
"Tirkel her yoursel", Chardie, "interrupted his lardsing, "you're a single man!"
The mural is evident.

Yours briotically NICODEMUS DEWDROP.

REPORT OF THE TARIFF COMMITTEE.

and upon the shries, and neckolog the surfaces, the common of a. (2007) and its control is carried into effect, this merchanise will being not be numbered ket, and its should be known that the actional is, the control of the cortion house will be greatly increased the control of the cortion house will be greatly increased the cortion house and of the third in gold. Some increased the and of the third in gold. Some injustices are thinking of country in the cortion house and of the third in gold. Some injustices are thinking of country in the control of the cortion house and in the cortion house and of the chird in gold. Some injustices are thinking of country in force when the sound of the cortion house and in the gold. Some injustices are thinking of country in force when the control of the contr

indget committee of the Chemier of Deputies to slope the exchange rate of 14th per 13000 es the haits of calculation. It saids however, thet the haits of radiculation. It saids however, that that, while the measure suggested accomplishes that of 12th would be still better, and remarks that, while the measure suggested accomplishes the purpose of increasing the systems, it fails to accomplish that of efforting all decounts to national industry in e just and discretalishing manner.

The committee claims to have discovered that certain foreign merelandies protected by the present tariff compates disastrously with national merchandins of the same class, which is consequently obliged, in order to find consumers, to be said under foreign labels.

The committee says that its axemination of the tariff compared wild what is shown by the present exhibition proves that all protected classes of nectional findustry are properous, while those that receive no protection are in a state of decadence. In view of the limited them it which it had to prepare its report, its work, it states, is necessarily incomplete, but it presents an anatorated lias of articles which, in its opinion, require immediate legislative action for their princetion and it suggests that Congress shall empower the government to revise the tariff on the basis of the exchange rate of 14th or 12th, per 15000.

LEGISLATIVE NOTES

DEC. 7.—Senate.—The Senate austained is amendments to the hudget of the navy department and voted to 2nd discussion the bill for a line of ateamers batween S. Francisco and Tutoys, on the river Parnahyba.—Chamber of Deputies.—Deputy SA Peixtoot introduced o hill far a railway from Manaos to the frontier of British Guiana. Deputy Ty Manac Cavalcanti introduced a bill on the pay of the employée of the intendencia da guerra and of the absolutoris chimic opharmaentico. Deputy Gaspar de Drummond defended the amendments which he offered to the bill on banking districts. Deputy Edoardo Ramos unived to recomment the hill. He denied that the agriculture of the country is prosperous. Deputy Reico Coelho: offered a substitute hill. Deputy Alcindo Gunahnara spoke in the hill on deposits of banks of issne. He compensation and he is inclined, he said, in agree with Deputy Rosa e Silve in thinking that the commensation should be paid by the Banco da Republica.

DEC. 9.—Senate.—Barko do Ladarin attacked the state government of Amazonas, which, he said, had resorted to viulgace and fraud for the purpose of carrying the elgaffiors held on the 30th ult. and 1st inst. Senator Oiticra opposed the special appropriation of 14,000,0000\$ for military expenses in Rio Grande do Sul. The appropriation was defended by Senator Moraes Barros.—Chamber of Drimties.—On motion of Deputy Martins Junior the Chamber expressed deep sorrow for the death of Councillor Machado Portella. Deputy Serzedello defended himself from the charge of having purposely assumed a neutral at tude turing the naval revulotion. In regarl to that revolution he had not been consulted. He hall displayed no resentented to this account, but had suffered neglect in silence. He could not offer his services to the revolutionists, who had not concent him to this account, but had suffered meglec in silence. He could not offer his services to the revolutionists, who had not concent him to this many management of the state. Deputy Eduardo Ramus defended Mr. John Gordion, who, le sa banks of issue.

banks of issue,

DEC. 10.—Senate.— Senator Juão Barbilho muved to express the prolonnd sorrow of the Senate for the decease of Councillor Machado Partella. Senator Oiticia spoke in favor of protection. The Senate woted in 2nd discussion the bill on brokers, the special appropriation of 14,000,000 for military expenses in Rio Grande do Sul and the bill for reorganising the polytechnic school. The bill no reacancies in Congress was voied in 1st discussion.—Chamber of Defuties.—Depuise Eduardo Ramos and Vergne de Ahreu spoke on the Arteisa do Prado question. Deputy Rilierio de Almeida introduced a bill for cattle fairs. Depuiy Costa Machado defended his bill for federal intervention in the states.

DEC. IL.—Senate.—Several members of the

DEC. 11.—Senate.—Several members of the DEC. 11.—Senate.—Several members of the finance committee explained their views on the revenoe hill. Senators João Neiva and Moraes Barns disensed the budget of the department of industry. The latter opposed the reduction of the appropriation for the iron factory of Jnanema from appropriation for the iron factory of Jnanema from offered ao âmendment authorising the lease of the Central rathway and empowering the government le diapose of its other rallweys by sale, lease me trensfer to the state governments.—Chamber of Dephities.—Deputy Belisario de Soura moved to ask for information in regard to the protest of the minister of industry against the charter for e real-way between Petropolis and Mesambomba. He aveiled himself of the occasion to speak in favor of reinstating in their professionship Der, Hilario de Gouvêa and Gongalves Mala. Redrass for wrongs, he sald, should be inpartial and complete Deputy Nelva spoke in favor of protaction, which he desires sepecially for au Iron inundry in Belia. Deputy Alcindo Guanabara introduced e bill for legalising exporiments of employse of the dapart, ment of finance, made us to dete, including thous its which the formality of competitive axemination has not been observed. Among the bills voted et this siting are the following:—Resturation of Dr. Serzedello to litis rank of hauteuant-colonel of engineers and to his professorable in than military school; hill on deposits of hanke of same with amendments of Deputy Jaso. Lupea and Deputien Erice Coelbo and Alcindo Guanabara. This latter amendment, which was passed by a vote of \$8 to \$7 a provides for compensing hanks of issue on the basis of one-third of the interest of the respectiva hands, council for \$47 years and calculated at the exchange rate of 24d, per 18000.

BEG. 12.—Senate.—Senator Christiano Ottoni spoke on the Central railway. He said that the

lasta of one-third of the interest of the respectiva lands, counied for 47 years and calculated at tha exchange rate of 24d, per 18000.

DRC, 12,—Stradt.—Senator Christiano Ottoni spoke on the Central railway. He said that the operating expenses from 1835 to 1865 amounted, on an average, to 663 for the 1866 real to 1865 to 1869, in 1803, to 96% thereof; from 1855 to 1869, in 1803, to 96%; in 1804, to 1804. The operating expenses from 1804 to 1804, to 1804, to 1804, to 1803, to 1803, in 1804, to 1804. The operating expenses for 1896 are estimated at 27,000\$, ooo\$, of which is 1804 was 2,000,000\$. The operating expenses for 1896 are estimated at 27,000\$, ooo,000\$, little operation 19,17,000\$ in 19,17,000\$ in 19,17,000\$, ooo,000\$, in the construction of 19,17,000\$, the control of the control o

on the roll being called, it was discovered that only 92 were then present. The house consequently adjustmed,

Dec. 13.—Senate.—Bauão do Ladario said that the article published by Admira! Jeronymo Gonçelwes is an evasive answer to the charges made against him. The admiral's strictures on the binniers and abuses committed by Marshal Floriano Peixoto were made in a tram-car and the speaker has never asserted that they were made elsewhete. The charge of having sent a talse report of the sea-fight of the coast of Santa Catharioa, Admiral Jeronymo leaves entirely unanswered. The charges against the admiral are sunported by official locaments. Senator Osicia said that he regretted the necessity of opposing the report of the finance committee on the revenue bill. It is greatly to be depfored that that committee should advise the Senate to persist in the deleterious practice of obliterating itself to the discussion of the financial problems of the country. It is, moreover, much to be regretted that in that report the committee frequently contradicts itself. Comparing the estimates of the government with the bill voted by the Chamber of Deputies and that the government had asked for 300.884,000\$, the Chamber granted 361,085,000\$ and the proposal of the committee, he said that the government had asked for 300.884,000\$, the Chamber of Deputies and the sease of the government with the bill voted by the Chamber of Deputies and that the government had asked for 300.884,000\$, the Chamber of Deputies and the sease of the sease of the proposal of the committee, the said that the government had asked for 300.884,000\$, the configuration of the senate committee according to the senate's amendments, rejected by the Chamber of Deputies and the senate's amendments of mandements. The Senate's amendments of the senate's amendments of the senate's amendments of the senate's amendment of the senate's amendment

ing the account of Lage Bros.

DEC. 14.—Strate.—Rarão do Ladario offered a monom to task for information in regard to the sum of 400,000 % which Admiral Jeronymo Gonçalves is said to liave drawn from the Banco da Requablea through the Banco Italo Uruguay of Montewdeo. Senaior Leopoldo de Bulhões answered the speech made, at the previous sitting, by Senaior Oincea. He said that the country depends on the custom-house for its revenue and consequently cannot saddenly establish a protective tariif. Many sources of revenue bave been transferred to the

atate government, whose combined linoma now amounts to aloud 130,000,0003 per annun egenst 30,000,000 in the tituse of the monarchy. The new cources of revenue of the general government have not proved as producive as her line aspecied. The tibacce isa, for invence, whose product had been estimated by Ruy Barboss et 10,000,000 per annum and by Redges Alvers a 6,000,000 per annum and by Redges above a 6,000,000 for redges and tituse the rudent, he said, to impose on bear and other beverages a protective duty which receips a mounting to about exact, to impose on bear and other beverages a protective duty which senter a continuous of the conton-house of receips amounting to about 4,000,000\$ per annum. Sentar Ramon Barcellos sand that the revenue of the country would be amply sufficient if it were properly collected. At present large propertion of that revenue large propertion of that revenue large propertion of the revenue and favoid through a sugging and froud. Châmber of Deputes. —Deputes Thomas Cavaleanu and Augusto Second declared the Senarcis amendments to the binding the continuous propertion. The control of th

of the Rus do Ownfor simos every day.

—The recent gubernavorial election in Pernam-bu o is said to have called our very few whers. According to an exchange, only 200 votes were cast in the city of Pernamburo which has t4,000 qualified voters.

Comment is unnecessary.

-There was a leaviful ceremony at S. Christo-ta). Serejpe, on the 8th inst. It was nothing less than the unveiling of a nonrait of Col. Valladas in the police station. We do not know that the portrait blushed, but it ought to have done so.

— In \$30 Paulo also the ottgens are having in finite difficulty in protecting their shade trees. Somehow a tree planted in the street is considered public property, to be broken diwn, hacked, town up, or carried away at the pleasure of the first vanida who comes along.

—At Iraparanga, Sergipe, a mail carrier was arrested on the toth max, but after he ng held a causady for a few hours. We set at liberty. It supposed that the police arrested him for the purpose of seizing the election returns contained in the mail bag in his possession.

the mail bag in his possession.

At Pará, on the toth inst, there was an explosion in the powder factory of Vilinha & Co., which was completely destroyed. After the explosion fragments of 12 corpses were found in the aljoining wood and during the day there were taken to the Portuguese hosoital 27 wounded operatives, two of whom died that night. One of the owners of the factory was also wounded. The damage is estimated at 600,000\$000.

The São Panhy Italians are having a real old Sicilian carnival of it. Our São Panho etchanges have a murder to record almost every day, and genarally one ir both of the parties of meemed are of that nationality. Why is it, we would like te ask, the Italian shapea's in his kinfe so frequently ovar trifling disputes?

ovar trifling disputes?

The municipal concil of Santos has asked the state government of San Paulo to pay the expenses memred by the municipality from 1882 to 1894 in the treatment of yellow-fever and small-nox, amounting to 39,824\$774. The secretive of interior of this state declines all responsibility for these expenses, however, and says that they are exclusively local in character.

The diversion of the Santo-Courte Courter Courter of the case of the state of the

exclusively local in character.

—The director of the Santes Commercial which was wrecked a few days go by a pury of firemen onder Alferes Fabio Paulista, says that this officer is an extreme pertisan of the jacobin strue, that the city conneil is also responsible, and that there were no policemen in the neighborhood at the time of the attack. The regulars on guard at the custom-hones were witnesses of the initiage, but made no effort of interfere. This makes the scantal of it all the greater. The paper will be republished as non as material can be obtained for a new printing, office.

—The Daniel for inferious at the obtained for a

new prinving, office.

The hospital for infectious diseases at São Paulo receiver 7 new cases in November, which with the 4 remaining from October male 1 to under reatment. Of thee 5 were discharged cured, 3 died and 3 remained in the wards. Of the 5 discharged, 5 were small poor cases, and 2 croup. Of the deaths, to as from small pox, to from moup, and to from pethowlever. The hospital has been placed under the charge of Miss Price, an American trained nurse, and two more American unuses are expected to arrive tonday on the Magdalena who have been engaged for assistants in the same hospital.

hospital.

—Telegrams from Alagnas state that 200 policemen from Jacuhype are burning houses and cane fields and otherwise devistating the country through which they pass. The people are alandioning their plantations and fleeing in terror into Permanbaco. On the other hand the state government telegrands that Manuel Isoloro, whom the police are trying to can fields in four plantations and last intended himself with a lorse, armed with Comblain tiffes, for the purpose of resisting the plantations and contended himself with a lorse, armed with Comblain tiffes, for the purpose of resisting the plan of the opposition party for casting an insurrection in the state.

—For simon unre-concil and immentitience, the

for causing an insurrection in the state.

— For simon-pure conceit and impertinence the preparatory similents of the Sair Paulo Law school will stand very mear the head of their class. In their telegram to the President on the 6th, after having attacked a professor with potencial content of the professor maintained epithers, they say, — The undersigned, republican students, ask of your excellency the dismissal of the interim professor Dominions Leopoldino in the name of the morality of public instruction," etc. What husiness have these beardless losys to call themselves "republicans" and to use that title in a petition to the President? And after having assaulted one of their professors materials a police force called into resine order, how due they talk about the "morality of public instruction"? It seems to us that these boys need a lattle instruction not found in the carriculum of their school.

RIO GRANDE DU SUL.

Lulio de Castilhos has instructed the intendant of Peloias to protect the eiliturs of the Diarro Popular. He says that he considers himself in honor bound to maintain the liherry of the press. From the independent press of the state, however, the Diarro Popular gets linke sympathy. The Correso Mercantil and Astasta remainl it of the atitude which it assumed, when they were persecuted by Julio de Castilhos and when the printing-office of the Testinna Federal was attacked and destroyed.

Correo Mercantil and Astata remind it of the attitude whech it sesumed, when they were persecuted by Julio de Casudhos and when the printing office of the Tribuna Federal was attacked and destroyed.

A telegram of the 6th inst, states that the 35th haration of infanity had received orders to return to Piaulis, where it was stationed before being sent to Rio Grande in t893. The 1th regiment of cavalry, it is reported, will be transferred on the 1st prox. from S. Borja to Unguayana.

A telegram of the 3rd states that a brigade of irregular incops fromerly commanded by Santos Filho has been disarmed and dishanded. The northern part of the state is now said to be occupied by 400 men from Parana under the command of Cod. Bormann, derector of the military colony of Chopino.

Julinde Castillios, it is said, has given unders for the organization of two more battalions of state trops, each of 400 men.

Complaints commune to be made of Castillistians. Julia Francisco's men, who are camped at Ibirapu tan, have recently stolen 800 sheeps. Some time ago at Capão Alfo a hody of Castillistias attacked and robbed the house of Francisco Larrathea murdering five men and one woman. At the estancia of Luiz Severiams they murdered a man and a boy of eight year, of age.

Councillar Alves de Arauji to coming to Rio de of cartile which were taken from the estancia by the troops of Sautos Fisho and Pinherri Machido. The war department has given orders that after the 1st of January all pytinests of r military expenses shall be pa i through the costom-house. The shreps of Cap. Ratili, whose arrest we ment med in a recent land, is a siaff, died at Pelotas on t. e. 7 hinst.

Col. An mino Acamaja, of Uraguyana, has abandoned the pay of Julia de Castilhas and joined that of Dr. Hinnero Baptsta. The latter's organ, the Repoil Lie, cont mes to a lavocate the revision of the state constitution.

On the 8th inst, a Parto Alegre a committee of 40 laties called on Julio de Castilhas and joined that of Dr.

church against the persecution with which it is threatenerf. He promised them that he would, if necessary, use force for repressing all overt acts of religious intulerance.

Rapficel Cabella has protested against the con-duct of the municipal connected filmamento, which has sered the reni of his houses.

nas seizen the rent of his houses.

At Porth Alegie the lineau of public works is calling for tenders for building a new government

house. More Casillhista intrages are reported in Rio Grande and telegrants state that for the federalist there is no secretly for life for paperty. In consequence of this state of affairs many of the locitalists are taking refuge in Urugnay. The horels at Montevilles are said in the criwiled with refusions at Montevilles are said in the criwiled with refusions.

at Montevidea are said to be convoled with refuges.

The troops under the communit of John Francisen have taken a posminent part in these unitages; furt it is move and that three troops are to
be dislanded and Ensign Botelho Athayale has
bren sent in receive their arms and those of the
rest of Gen. Hyppolito's command. It is stated
that the oth and 21st battalmons of Castillistis will
also he dislanded. At Command, he has been
very much annoyed since his return by a land of
Castillistas multer the command of Christ who de
Ambrade. Col. Forces and the chief of police of
the state have going to Camandana to investigate the
uniter.

natier. At Santa Ciriz, Major Padilha, a prominent federalist, has been killed. The Castilhistas assert that he was shot by one of his own men. A Castilhista, Juha Comildo, who was arrested for killing a consin of Gen. Menna Barreto, has obtained a with of hadron corput.

Gen. Galdar has asked for leave to come to Rio de Janeira as soon as all the Cast lhistas are dishalander. He states that he desires to confer with the government on subjects of the atmost importance relating to his halty its commander of the district and to often the definition of the first production. The Castilhistas assert that he will not return to Rio Grande.

On the 15th inst. the 35th battallon of infantry

On the 15th inst, the 35th hatalion of infantry took passage for Kio de Janeiro on the steamer Salelite. It is reputed that the 25th hatalion is also to be within any from Kio Grande.

Some excitement has been conserl at Livianienth and alleged trespass on Brazilian territory by mores in the employ of the municipal authorities.

RAILROAD NOTES

—On the Jahn hranch of the Panbsta railway a was killeil.

—Five new locomotives have recently arrived from Europe for the extension of the Bahia and S. Francisco (ailway.

-On part of the circular framway in Bahia elec-e traction is to be used. For junctuasing the out there will be an issue of debentures to the rount of 1,250,0008.

—The minister of industry has protested against the chaiter granted by the the slate of Rin of Janciro for a milway between Petropolis and Maxambumba and has instructed the solicitor-general of the republic to tale sweb legal steps as are necessary for sustaining the protest.

as necessary for sustaining the process.

—Sume alays ago a train was detailed on the Oeste de Minas railway between the Manacash hadge and the station of Fromm. The conductor and engine-driven were killed and a fireman and two brakenien were womneld. The accudent is attributed to the load as train of the lure, to the incompetence of the engine-driven and to the insufficient number of brakenien.

S.10 PAULO (BRAZILIAN) KAILIVA: COMPANY (LIMITED),

To the Editor of The Statist:

To the Editor of The Statist:

Str. — Having read the article in your issue of the tolt inst., with reference to the lattice alivided purspects at this company, allow me treal your attention to the fact that the statement respecing the terms of the increase sanctioned by the Brazilian government on our tauffs is entirely memories. I shall therefore he while jeel by your drawing attention to this in your mixtissue.

I am, Sir, yours obediently, JOHN BARKER, Secretary.

I am, Sir, yours obeliently,

JOHN BARKER, Secretary.

London, 20th November, 1895.
In our reference last week to the São Paulo
ralioad we stated that the company in 1894 obtained power to increase its tariff by 5 per cent,
for every it, fall in the exchange between 20th,
and to 1. This was not a quite correct methal of
stating the case. At the beginning of 1894 the
company made application to the Brazilian government for power to increase the company's tariff by
means of a slitting scale such as had been given to
the other companies, viz., power to increase the
tainfily 5 per cent, for every id, decline in the
exchange from 20th to 10d, 2 and, though the
government did not sanction in shifting scale, it
authorised the company to increase it rates in
emirency on passenger and must classes of goods
to the extent of 50 per cent, the ryclange at that
time being below tod. Our remark that should
exchange finther decline the company would have
to bear the additional hoss was correct; but the
slatement that of there is no recovery the company
must reduce us triff by an equal mostant was incurrect. Bat, as the company has on the addantage if the sliding scale agreement asked br_e, is it
exposed to the government requiring a greater
reduction in the tariff than 5 per cent, per till, improvement in the earth and 5 per cent, per till, improve expedient for the company to reclace the
rates by 5 per cent, on its uwn initiative with
every tal, the in exchange? And may it not
pove expedient for the company to reclace the
rates by 5 per cent, on its uwn mixture with
every tal, the in exchange?

COFFEE NOTES

The Guzela, of Descalvalo, São Paulo, says that the next crup will be but little greater than the present one, owing to the prejudice caused by the heavy rains. Many of the first flowers, and the young fuilt from the second flowering, have been knuckel off by the rains.

On the 13th inst, the governor of the state of Rim le Janeilo signed the bill empowering him to make an agreement with the state governments at Minas Genes, S. Paulo and Espiriti Santo for altering the present system of collecting the tax on cuffee. The plan adopted in this bill is to cellect 5 reis, pre kilo on cuffee when it enters the federal district and 11% of its value in the act of shipment.

Since. The plant anopted in the first to concert specific price in prikilo on eaffee when it enters the federal alistic and 11% of its value in the act of shipment.

—The committee appointed to report on the cumulation and prospects of the coffee erop may ketted in this cay, has published the following:

"The alumnlant rains which we have had during the current year, has contributed to considerably ineignrate the coffee trees, which, in general, are covered with heavy foltage; the flowering, however, in spine of its alumnlance and appearance can fire than in preceding years, has notwiths anding not matured in a corresponding proportion, through having been damaged by the rains. For this reason that committee, comparing the present flowering, in a state of maturity, with preceding mes, considers that the crop of 1896-97, exportable from the department of the first property of the control of the season threatment to be stroy the ready and of the season threatment to be stroy the whole crop. —What has given the Kona people more encouragement than anything close is the rapid disappearance of the bidght, which in the early part of the season threatment to be stroy the whole crop. The ladybird recently introduced in the district shid and begin operations on the coffee trees until aboun its weeks ago, confining themselves at first to the gurva bushes. They lay formant all winter and when the warm weather set in appeared in small numbers on the guava trees. When they first appeared the hadters feared they would not spread to the offee trees but a few weeks alter when the warmer weather set on myriads of the hight, whereas the whole crop was the steam with total destructural more than half a crup will now be saved with the prospects for future seasons exceedingly beight. —He result will be that whereas the whole crop was the steamed with total destructural more than half a crup will now be saved with the prospects for future seasons exceedingly beight. —Hessition Commercial Journal, Honolan, Ang. 13

LOCAL NOTES

AN ACKNOWLEDGMENT.

AN ACKNOWLEDGHENT.

On his departure from this city a fortnight ago, after a six muntles' residence as substitute for the Rev. Henry Musley, chaptain of Christ Church, the Rev. K. James Doble was presented by the English residents of Rio de Jameiro, as a mark of their estern and appreciation, with a puise of Zioo. During his his residence here Mr. Duble made many warm triends and his return home was made the object of many vincese regrets. In response to the substantial manner in which this appreciation was manufested, Mr. Duble writes from an honorl the R. M. S. Nile as fullows:

R. M. S. Nile,

R. M. S. Nile, Dec. 8th, 1895.

Dear Mr. De Lisle,

Deen Alr. De Lisle,

If m any way you can convey my further thanks to my Rin fineds for the present they gave me on Monday lat will von kindly do so.

I am afaid that at the meeting I failed to express all I lelt. No such generous testimony of the gondwill of the English-peaking culony at Rio was in any way expected by me, for the kindness I had previously experienced during my stay in Brail, was sufficient to make it one of the happiest periods of my life, which I shall look back on with the greatest pleasure.

Again thanking you all,

Believe me,

Yours very sincerely,

(signed) R. James Doble.

DEATH.

SMITH.—On the 15th line, at Rio de Janelio, of accesso pernicuso, W. Burness SMITH, son of Mr. James Smith, of Blikenhead, sgell 27 years, Deeply mourned.

It is really wonderful what you can do with figures!

—In his comments on exchange the editor of the South American Journal of Nov. 16th says:—"As recard the Brazillam milers, it has st-andly fallen until it has been quoted in the neighborhood of 9d., almost the lowest piec on record. I understand; that this fall in the Brazillam milers is really due to the collapse of speculation for Paris. There appears for some time past to have been a somewhat big speculation for the itse in the Brazillam exchange on the Paris Bourse, and the Frenchmen, in order to assist their operations, sent gold out to Rio. The collapse came on the Burse, heavy losses were incurred, and this not only put an end to the speculative movement in exchange, lut it made it necessary for instructions to be sent out to Rio for the gold to be returned. It is this withdrawal of gold from the Rio market that, I understand, has caused the sudden drup in the value of the militers."

Landing of goods, heavy machinery and live cattle. Floating Steam Crane for lifting up to 30 Tons weight.

Powerful steam pumps. Drag boats. Stone ballast supplied to ships. Slip way and work shops at Toque Toque, (Armação, near Nictheroy).

DO YOU BATHE?

Of course you do, and in order to enjoy your bath you must have one of our INSTANTANEOUS WATER HEA-TERS, a machine that will heat enough water for a comfortable bath in five minu-tes, burning an insignificant quantity of gas, and will heat water instantly for all other domestic purposes, being always ready

These machines being constructed entirely of copper, their durability is in no wise affected by any chemical action arising from the actio or alkall contained in the water, and the three points of vantage we claim for these machines over all others are:—

1. That they burn 80% less Gas.

That they will last a life time and not rode and wear out in a short time as is case with cheap iron ones.

3. That in addition to being a useful and pratical necessity, endorsed by leading physicians, it is a handsome feature of decoration to the bath room and is guaranteed for 10 years from the date of purchase.

We invite the public to visit our office, where will afford us the greatest pleasure to show il machine working and answer any question explanation.

We will undertake to place this machine in working order in your bath room for a very reasonable price, our address is

THOMAS PRICE & Co.

THE FRANKLIN TYPEWRITER.

"GUARANTEED THE BEST

SOME DISTINCTIVE FEATURES

Simplicity.-Has fewer by six hundred Type Cleaning.-The types are cleaned parts than any other type-bar machine, thus reducing liability of getting out of order. Any intelligent person can un-derstand and operate it.

Durability.—All metal, except the key-tops, platen, and feed rolls. Constructed of the best material, by the most skilled

Alignment.—The type bars are guided, thus ensuring exact and fermanent alignment.

Speed.—The expertness of the operator is absolutely the only limit to its speed.

Visible Writing.—Every letter is shown as soon as struck, and the work remains in sight. Corrections are thus easily made, and context verified.

Manifolding.-The stroke is downward, direct, and powerful, making it the most ferfect manifolder and mimeographer on the market.

Repairs.—Owing to every part being interchangeable, purchasers can almost invariably make what few repairs may be needed themselves, thus saving co-t of repairer. The machine is therefore extremely economical.

charging parts.

in five seconds time, without touching with hands

or loss of time in changing ribbons, the latter being reeled from the spool on which it is purchased to the machine

Keyboard.- Has the standard keyboard. with capital shift, locking shift, and celluiloid keys—the latter being black all other articles appertaining to and white, as recommended by eminent this line.

A Time Saver, -Owing to its automatic paper shift ribbon changing device, ease in making corrections, quickness of type cleaning, and the fact that the work is always in sight, it is the greatest time-saving writer manufactured.

Appearance .- Without exception, the handsomest typewriter made, beautifully nickeleil and japanned—an ornament as well as an article of necessity.

Work .-- Its work is clean, clear cut, and beautiful in appearance. samples che erfully furnished upon application.

Arranged for writing Portuguese, French, Italian, Spinish and German, without
